Office Action Summary

Application No.

10/076,181

Applicant(s)

HILDEBRAND ET AL.

Examiner

Kevin Bates

Art Unit

2155

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 November 2005.
2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 10-21 is/are pending in the application.
4a) Of the above claim(s) _____ is/are withdrawn from consideration.
5) ☐ Claim(s) _____ is/are allowed.
6) ☒ Claim(s) 10-21 is/are rejected.
7) ☐ Claim(s) _____ is/are objected to.
8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
3) ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date 11-7-05, 8-1-05
4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
5) ☐ Notice of Informal Patent Application (PTO-152)
6) ☐ Other: _____

Response to Amendment

This Office Action is in response to a communication made on November 23, 2005.

The Information Disclosure Statement has been received on November 7, 2005 and has been considered.

Claims 1-9 have been cancelled.

Claims 10-21 are currently pending in this application.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 10-21 are rejected under 35 U.S.C. 102(b) as being anticipated by Misra (5757920)

Regarding claims 10, 18 and 21, Misra teaches a method for providing access management through use of a plurality of server machines associated with different locations (Column 4, lines 31 – 39), said method comprising the acts of:

(a) authenticating a user with a first server machine of the plurality of server machines with respect to a prior access request;

(b) subsequently receiving a current access request to access a secured item via a second server machine of the plurality of server machines;

(c) reconfiguring the first server machine to prevent further access by the user to secured items via the first server machine (Column 7, lines 53 – 65); and

(d) reconfiguring the second server machine to permit access by the user to at least the secured item via the second server machine (Column 5, lines 10 – 21, wherein the first server machine is the home domain, and the second machine is a different domain).

Regarding claim 11, Misra teaches a method as recited in claim 10, wherein said authenticating (a) authenticates both the user and a client machine being used by the user (Column 4, line 66 – Column 5, line 9).

Regarding claim 12, Misra teaches a method as recited in claim 10, wherein the first server machine and the second server machine are access points for the user to gain access to secured items (Column 5, lines 10 – 14).

Regarding claim 13, Misra teaches a method as recited in claim 10, wherein when the user is at a first location, the user interacts over a network with the first server machine using a first client machine at the first location, and wherein when the user is at a second location, the user interacts over a network with the second server machine using a second client machine at the second location (Column 5, lines 10 – 21).

Regarding claims 14 and 20, Misra teaches a method as recited in claims 13 and 18, wherein said method further comprises at least the acts of: (f) determining, prior to said reconfiguring (c) or (d), whether the user is permitted to gain access from a second location to secured items via the second server machine (Column 5, lines 10 – 16).

Regarding claim 15, Misra teaches a method as recited in claim 13, wherein said authenticating (a) of the user occurs while the user is at a first location, and wherein said receiving (a) of the access request to access the secured item from the user occurs while the user is at a second location (Column 5, lines 10 – 21, wherein the system has a home location with maintains the credentials and authorization, which is then distributed through the server system).

Regarding claim 16, Misra teaches a method as recited in claim 16, wherein said method further comprises at least the acts of: (e) determining permitted locations from which the user is permitted to gain access to secured documents; (f) determining, prior to said reconfiguring (c) or (d), whether the second location is one of the permitted locations for the user; and (g) bypassing said reconfiguring (c) or (d) when said determining (f) determines that the second location is not one of the permitted locations for the user (Column 5, lines 10 – 21).

Regarding claims 17 and 19, Misra teaches a method as recited in claims 16 and 18, wherein when the user is at the first location, the user interacts over a network with the first server machine using a first client machine at the first location, and wherein when the user is at the second location, the user interacts over a network with the second server machine using a second client machine at the second location (Column 3, line 67 – Column 4, line 7; Column 4, line 66 – Column 5, line 2; Column 5, lines 10 – 19, wherein the user and machine locations are roaming in the system and which ever domain the user/machine combination logs in at it connects to that domains controller which is the same location as the machine location).

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

U. S. Patent No. 6134658 issued to Multerer, because it discloses reconfiguring a second server to permit access of a user.

U. S. Patent No. 5944794 issued to Okamoto, because it discloses checking user information and machine information to permit access to a server.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Bates whose telephone number is (571) 272-3980. The examiner can normally be reached on 8 am - 4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Saleh Najjar can be reached on (571) 272-4006. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
